Please enter below any comments on how the course should be improved

Comments

More exercises for practice

It would be great if it could be a little more organized

More graph theory and other concepts more related to computer science and engineering would be very useful, as that is the main concern of most students.

If not, at least covering graph theory early on in the semester may be better because since it is usually the last chapter lectured, is greater chance of skipping some topics since the semester is ending, which is unfortunate because this is the topic that most students would prefer the most time and focus spent on.

Please enter specific comments, if relevant, on the role that Information Technology plays or could play in this course

Comments

Technology played the role it could in this course with professor Aymans great website

The provided website with links to lecture notes and past papers were extremely, extremely useful and were an essential part of helping me learn the course. This should definitely be continued in future semesters and, in my opinion, should be continuously on to every semester.

Other comments

Comments

Overall, this course was very good to help in thinking outside the box. The professor had made me want to learn more about the subject because of his vast knowledge.

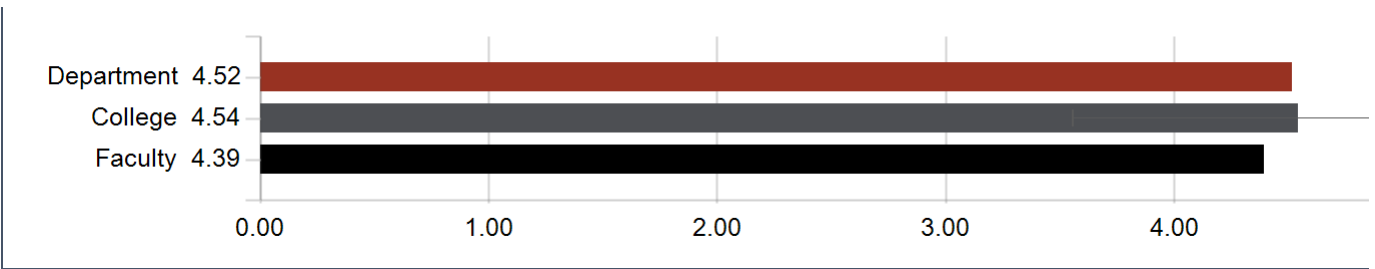

In my opinion, it would have been nice to have quizzes in the course. Something to help boost the grades if you weren't doing so in the Midterms

I just want to thank Prof. Ayman on his teaching this semester. He made the course seem interesting and challenging.

Please provide your instructor with helpful suggestions for improving his/her effectiveness

Comments
He may not realize this but some of his replies are not as nice.
Advise to get lecture notes and plan lectures ahead. Everything from the top of the head is very ineffective way of teaching. Being students who ask questions and making them out to be stupid is also harmful and very consistent with your behavior in class. It was great to see that improve
You were a great professor thank you. Maybe sometimes we went a little too fast but overall you were good.
Professor Badawi was an excellent instructor with a deep knowledge and passion for the field. It was very helpful to have someone proficient in mathematics as him as our teacher. He helped me develop an interest for the course material through his capabilities and enthusiasm. He explained complex concepts in a highly effective manner that is understandable for students and I think this should continue. Further, he would often share with us interesting details about higher math from outside our course, just as motivational learning, and this was extremely valuable and fascinating.
One suggestion for improvement, since he would teach without any written material on hand, sometimes the examples given were ineffective or he may accidentally miss a step, and would hence have to improvise as we went. Instead, it would be very beneficial if he came to class with a copy of some questions prepared beforehand.
