INTRODUCTION

This report contains the results gathered during the online course-instructor evaluations. Students were invited to share their feed the teaching and the course material, ultimately to help improve the overall quality of education at our institution.

It is now our collective duty to turn this insight into action.

As part of this mission, all instructors receive an Individual Report for developmental purposes i.e. to identify strengths and areas improvement in regard to their teaching methods. Contents include graphs, tables, rankings, frequencies, statistics, and comment well as reflective questions to help guide you in the preparation of your personal development plan.

We urge every Faculty Member to diligently examine all the analysis, to seek to understand it, to take note of patterns, to draw log conclusions and to take it upon yourself to act on the valuable feedback your students have taken the time to provide.

If examples are provided before explaining or giving the definition, idea, or the “know windows” it makes undrestanding easier ar makes more sense and it is easier to keep up with the professor but overall good course
it should be more organized

Please enter specific comments, if relevant, on the role that Information Technology plays or could play in this course

More examples help students undrestand better and make it easier if possible
It would be better if you can foster more discussions, listen more to the students, and encourage questions.
the professor can often be disrespectful when answering questions and he makes it intimidating to ask anything in class. he always dismisses way too late as well
please do not get angry in case a student asks questions while you are explaining, it is discouraging.
