INTRODUCTION

This report contains the results gathered during the online course-instructor evaluations. Students were invited to share their feedback on the teaching and the course material, ultimately to help improve the overall quality of education at our institution.

It is now our collective duty to turn this insight into action.

As part of this mission, all instructors receive an Individual Report for developmental purposes i.e. to identify strengths and areas for improvement in regard to their teaching methods. Contents include graphs, tables, rankings, frequencies, statistics, and comments, as well as reflective questions to help guide you in the preparation of your personal development plan.

We urge every Faculty Member to diligently examine all the analysis, to seek to understand it, to take note of patterns, to draw logical conclusions and to take it upon yourself to act on the valuable feedback your students have taken the time to provide.

What did you like the most about the course?

Comments
The professor's teaching style is very effective, clear and understandable. The professor was also very engaging and he had a lot of material to support us.
I liked the way the course was taught. Especially the teaching that the professor had done. Since the course was lecture based it would've been difficult but the professor thoroughly explained and answered questions and the fact that the lessons were recorded were a big help as after class if i missed something I could go quickly check.
The course syllabus was clearly defined which aided the students in approaching the class with a clear understanding of what was to be achieved.
I loved how clearly the professor explained, I always came out of class understanding everything.
The professor is really good and I also loved the way he explained
The organization constructed from the professor
It was well prepared. the professor is really sweet and understanding. He would always offer all the help we need.
The material was easy to comprehend due to the professor’s easy going and relaxed teaching style.
Professor Ayman Badawi teaches really well. He makes the course seem so easy and fun to learn. It honestly encourages me to take more courses with him. He makes sure everyone understands the concept.
The explanations of the topics in the lectures were very well done and this made it easy to follow and understand. There were many practice questions given to practice and develop my understanding of the topics. The professor was approachable and would help with any questions we had.
attendance regulation and the example questions were very helpful.
The professor made sure to explain every concept properly which I appreciate very much.

Suggest specific improvements to the course, if any.

Comments
Perhaps the syllabus could be a little clearer for the quizzes but that was not a major issue.
No real improvements but because the course was online i wish there was an easier way to submit answers.
The online approach of learning math is slightly difficult due to the size of the 'board' and the fact that students are not able to interact and point out questions they may have about a graph or diagram, as readily as they would in a classroom.
None
Upload more resources.
Needs no further improvement.
could afford to teach a little faster
Some concepts that came in the exams were explained in class very last minute, I wished we learned those concepts beforehand. (Plus, we only learned them last minute because the students noticed we didn't take this concept).
