### What did you like the most about the course?

Comments
The instructor
All concepts are very applicable to my field of interest which is Cybersecurity and cryptography. A topic that is often left out in our computer science education at AUS.
The professor is very friendly and knowledgeable. He makes the class less stressful by making light-hearted jokes. His exams are perfect; covers the material discussed. He asks questions that check if a student understands the material or not without "torturing" the student.
I am generally horrible at math. But this course was much easier to understand thanks to Dr. Ayman. It made math a little fun for me, for once. The class was funny and interactive.
The professor's passion for math was contagious. Proofs and logical statements blew my mind!!
the course material was one of the best i've undertaken yet. really interesting and engaging topics Professor is hands down one of the best this uni has been blessed with. W professor. All students' fav
I liked the professor's teaching method, as he gave us all the information we needed during class lectures, and i liked how his learning style is problem-solving based as i find it easy to follow.
best professor in this university hands down. Very clear instructions, very clear explanation, and is willing to help anytime. Makes everything easy

### Suggest specific improvements to the course, if any.

if there are power point slides or formula sheets that are organized to study from
More courses with the instructor
Perhaps more encouragement of implementation / use of technology
11/10 professor. Hope to take another course with him.
Keep doing what you do :) I wish you would take linear.
a little in depth delving into the topic would be nicer but time constraints are understandable
No improvements necessary. Everything was clear throughout this semester
