INTRODUCTION

This report contains the results gathered during the online course-instructor evaluations. Students were invited to share their feedback on the teaching and the course material, ultimately to help improve the overall quality of education at our institution.

It is now our collective duty to turn this insight into action.

As part of this mission, all instructors receive an Individual Report for developmental purposes i.e. to identify strengths and areas for improvement in regard to their teaching methods. Contents include graphs, tables, rankings, frequencies, statistics, and comments, as well as reflective questions to help guide you in the preparation of your personal development plan.

We urge every Faculty Member to diligently examine all the analysis, to seek to understand it, to take note of patterns, to draw logical conclusions and to take it upon yourself to act on the valuable feedback your students have taken the time to provide.

What did you like the most about the course?

Comments
The professor explains the concepts in an easier way and his exams are easier than expected
The Professor
Although MTH 221 is regarded as the most difficult math course at the university, the professor was able to make the concepts clear because of his excellent and direct teaching style.
It was fun and interesting.
I liked Dr. Ayman's teaching methods. He is by far the best professor that taught me a math course in AUS.
Dr. Ayman made the course easy to follow. His teaching style was very good. He provided relevant questions for each topic and conducted regular quizzes which helped me evaluate my understanding of the course.

Suggest specific improvements to the course, if any.

Comments
If Dr. Ayman teaches the course, it is perfect.
