INTRODUCTION

This report contains the results gathered during the online course-instructor evaluations. Students were invited to share their feedback on the teaching and the course material, ultimately to help improve the overall quality of education at our institution.

It is now our collective duty to turn this insight into action.

As part of this mission, all instructors receive an Individual Report for developmental purposes i.e. to identify strengths and areas for improvement in regard to their teaching methods. Contents include graphs, tables, rankings, frequencies, statistics, and comments, as well as reflective questions to help guide you in the preparation of your personal development plan.

We urge every Faculty Member to diligently examine all the analysis, to seek to understand it, to take note of patterns, to draw logical conclusions and to take it upon yourself to act on the valuable feedback your students have taken the time to provide.

What did you like the most about the course?

Comments
Laidback Professor, class content wasn't particularly hard.
The professor's teaching was what I liked the most about the course. He was patient, kind, went with every topic from the basics which helped so much. His teaching was slow, clear and concise. Teaching was excellent which made a subject I disliked very much to one that I enjoyed going to.
The material was taught in a very effective, straightforward way by the professor. All test material is from the class notes (question/solution), with a strong connection to exam material
I felt comfortable when taking exams and quizzes with my professor because I always knew it would be extremely similar to what I studied
when the professor would explain things and make them easier to understand

Suggest specific improvements to the course, if any.
