INTRODUCTION

This report contains the results gathered during the online course-instructor evaluations. Students were invited to share their feedback on the teaching and the course material, ultimately to help improve the overall quality of education at our institution.

It is now our collective duty to turn this insight into action.

As part of this mission, all instructors receive an Individual Report for developmental purposes i.e. to identify strengths and areas for improvement in regard to their teaching methods. Contents include graphs, tables, rankings, frequencies, statistics, and comments, as well as reflective questions to help guide you in the preparation of your personal development plan.

We urge every Faculty Member to diligently examine all the analysis, to seek to understand it, to take note of patterns, to draw logical conclusions and to take it upon yourself to act on the valuable feedback your students have taken the time to provide.

The course was easy.
Very good professor, he has experience and he teaches well. I understand what I learn and I do so quickly. Most of all he engages the students and his classes are enjoyable and fun.

Nothing at all
More set theory or do algorithms
no improvements, amazing course thank you !
love his teaching methods nothing to improve tbh but maybe add more quizzes it helps tbh
Professor Ayman is truly one of the kindest, but at time I felt his teaching methods were too informal – I feel like I haven't truly learnt what discrete mathematics is about even after a semester of learning it.
