Question:	Please enter below any comments on how the course should be improved
Response Rate:	15.00% (3 of 20)

1	This course was very well structured, and very clear in terms of material. As an architecture student, the material has helped me with my designs, in terms of zoning, divisions, understanding of measurements and shapes and much more. I'm glad I took the decision to take this course.
2	the course should be cancelled entirely due to it being useless since we learn about drawing rectangles and hexagons with a compass which was used 300 years ago. And now we have softwares that does that with one click. I found this course to be the most useless course I have ever taken in my 4 years of education in AUS. In addition to that it has nothing to do with architecture.
3	As this is a requirement for architecture students, the information is heavy and isn't directly related to what architect's have to do in terms of math calculations and so maybe the course should be directed more towards that. Also, since not all the students in the class are very good a math the exams were tough and the instructor should not challenge the students but just test their understanding of the fundamental principles, and make it simpler so that it's easier to understand.

Faculty:	Badawi, Ayman R
Question:	Please provide your instructor with helpful suggestions for improving his/her effectiveness
Response Rate:	5.00% (1 of 20)

1	Professor Badawi always spoke with a clear voice, was always on time, and went at the best speed possible when covering the material. He definitely made my love for math increase highly. He speaks of the material like he truly appreciates math. Professor Badawi was very fair when it came to grades and I felt like he made it a point to make sure everyone did well. Which is great, because he wanted to see everybody succeed and do well as well as understand the beauty of math and geometry. He was also very lenient when it came to exams and submission dates, meaning, he was willing to come in at any time during the week to be able to give us an exam depending on our schedules. I appreciated this very much, because he was willing to satisfy our needs rather than his own. During office hours, if i would have a question, he would answer thoroughly. I loved this course, and loved the professor for how he was and his wonderful treatment.

Question:	Please enter specific comments, if relevant, on the role that Information Technology plays or could play in this course

Response Rate: 15.00% (3 of 20)
--

1	More projects could be easily done on a computer, which is a much more likely method of constructing geometry in our field of study. We could use programs, such as Autocad, in class instead of manual tools.
2	The material was given only on the board and verbally, but that was more than enough. With the material of this course, in my opinion, it is best understood when the professor and students interact, speak, listen and take time with each other. Professor Badawi made the material very clear and understandable on the board.
3	None.

Faculty: Badawi, Ayman R
Question: Other comments
Response Rate: 5.00% (1 of 20)

1	I would definitely, without a doubt, take another course with Professor Badawi. Thank you for being a wonderful teacher and person.
