Question:	Please enter below any comments on how the course should be improved
Response Rate:	18.75% (3 of 16)

1	the course was well organized and really I started to use this course in other fields of my major
2	the book was useless. I think Ayman badawi should write his own book. he is an excellet professor.
3	linear algebra is an interesting course and really exciting course , however; the book was not so helpfull and in other word our main and only studing course was our notebook book and the instructor webpage.....it would really be nice if the book was different....

Question:	Please provide your instructor with helpful suggestions for improving his/her effectiveness
Response Rate:	50.00% (8 of 16)

1	he should learn how to answer students questions!! in our class we are afraid to ask him any question !!
2	The course was amazing and great!!! This is the first math course that I've understood from scratch and alone without external help, thanks to you! However you must be more open to questions of students and not be so tempered when students ask questions, no matter how stupid some questions can be, just answer them!!! Thanks
3	actually the instructor was so effective , but he was not respecting students when they ask questions he consider every question to be a stupid question .. I hope the he doesnot make fun of students in future sorry to say so but I have learned a lot
4	sir dont make fun of students when they ask u questions. adn stop imparessing them and respect them and dont make them a joke when they want ur help...in the class i had more than 10 questoins adn i didnt ask u about them because u didnt give me the chance.
5	Your attitude was very intimidation that many in your class were not able to ask question because they were afraid of your response and so that they save face and save themselves the embracement. You are an excellent professor and you are very knowledgeable, but remember that we are only students and not all of us are capable of reaching your level of understanding of linear algebra. Your teaching method was excellent however it requires a longer period and many examples so that the students can link between the topics taught. Overall, you are one of the best math professors in this university.
6	

	I really want to thank you for your effort, but I have one comment. I think that teaching is a matter of asking questions, but in your class believe me it was very difficult to ask you a question. I think that your way of teaching is very excellent, but I think you should be more flexible when it comes to asking questions. Believe me Making fun of the students will never help them to understand the subject. Overall, I am very impressed by your deep understanding of this course
7	Dr.Ayman Badawi is the king of the linear algebra, and i admit it, he is the one and the only one for teaching this course, but Dr ayman should now that not all the students are kings in the linear algebra. also there a major differances in students intellegance level.
8	students get scared of you when they need a question to ask..
